“Overview”

Expanding Horizons in Hematology 2026, a premier virtual academic conference on 4th April 2026 (Saturday), from 6:00 PM to 8:30 PM IST, will bring together leading experts to discuss the rapidly evolving landscape of hematology. The field has witnessed remarkable advancements in recent years, with the emergence of targeted therapies, immunotherapy, and novel treatment strategies that are transforming outcomes across a wide spectrum of hematologic disorders.

The program will highlight recent developments and emerging treatment approaches in relapsed and refractory leukemias, FLT3-mutated acute myeloid leukemia, chronic myeloid leukemia, multiple myeloma, and hemophilia. Through expert-led presentations and discussions, the conference will focus on the latest clinical evidence, evolving treatment paradigms, and real-world experiences that are shaping modern hematology practice.

For practicing clinicians, this conference offers an important opportunity to stay updated on recent scientific advancements, understand the role of newer therapeutic options in complex disease settings, and gain practical insights that can support informed clinical decision-making and optimize patient care in everyday clinical practice.
